

in the name of the Universal Equilibrium. The conditions of alkalosis and acidosis are nothing else but the result of a lack of oxygen caused by a lack of Love in the heart, mind and soul. (p. 162) We misunderstand Love, and like a full stomach we stifle it with our infinite desires, whims and discontent. *Life, like Love, is nothing else but absolute freedom of good will and complete restriction of unhealthy manifestations.* (p.27,29-31,33,57-58,111,148,171,173,184,189,192)

The joys and sorrows that come into our lives are the result of our attitude towards Love. We cannot force Love to serve us. (p.13,15,36,99,106,117,146,171,179) If our Heartiness is weak, our Spiritual Power, our Soul and Mental Beings, will remain to serve only the primacy of the Ego. (p.18,29,36,38,114,147,182,191,195)

When we define things as good or bad and adjudge them without trying them, we lose the opportunity to extract the best and most valuable in them. Just as we cannot know for sure which food is good for us without first studying its qualities, without trying its aroma and taste, without grinding and assimilating its substances, without it passing through our Stomach. **Our satisfaction and satiety depend entirely on our motivation to live.** Often in the moments when we are satisfied and full, hunger returns along with the dissatisfaction and laziness to do what we really want and need. *If our Heart energy is strong,* (p. 42) **we will always have the appetite to taste the food that life offers us,** to study it, to make and apply the methods for its sifting and assimilation. When we learn to be full and satisfied with the slightest joy and to give the best of ourselves every moment, **then we will be able to fully exchange, extract and feed on the useful substances of Life, invested in love, light, joy, wisdom and truth.**

Our Soul is a Divine desire - a drop of Divine Love, sent to the World to explore it, to love it and ennoble it. If we keep our Soul pure and blameless from ambition, and follow **the order of the supreme law, in which the Ego, Mind and Heart serve the holiness of the Soul, and she - the Love,** then we will always be the "Temple of the Creative Spirit" - *the source of unlimited possibilities and benefits.* (str.6,19,106,117,130)

It is our soul that wants us to grow beautiful, healthy, powerful, but only the strong Spirit, the bright Mind and the healthy Stomach can make us so, only if we overcome the hunger of the Ego and heartbreaking emotions. Life teaches us how to work with Love to build this healthy relationship with God. (p.153)

THE ASTROLOGICAL GUARDIAN OF LOVE

Love is the hand with which the Life Energy creates Life in its most wonderful forms. With this hand, the Infinite Potential nourishes and fairly distributes the goods necessary for the harmonious flow of Life. Love creates the material conditions in which the creative Spirit descends to realize the dreams of our Soul. (p.18,106,111,123,153,173,184)

On a physical level, in our body, **these conditions are prepared by our extremely sensitive Stomach** (*guardian of our Soul*), generating and transforming the energies of Earth (yang) and Air (yin), under the astrological control of the **zodiac sign Libra**. The astrological task of Libra is to maintain the harmonious distribution of intangible values in material goods, taking care of the harmonious balance of the Whole. (p.13,90,93,94,157,179)

THE SPEAR OF DESTINY

Intuition can nail or free the Soul from the shackles of the Primordial, (pp. 15,17,36,37-38,102,111,114,137,146,152,192) depending on our ability to feel and impartially judge and encourage our **personal participation in the harmonious flow of Love.** (p.17,37,42,68,92,93,106,116-117,157,170,173,175,179,191,195)
