The element Tree rules the fruits of the Spirit, i.e. the results of the interaction of the Subconscious, the Earth and the Superconscious. The Fire is the Primary Power of Life and Spirit, "igniting" the energy elements to illuminate the Ego, whose bright Will can release, awaken and realize the Soul potential of the Earth. The element Water carries the information of the Subconscious in order to invest in it the principles of the Superconscious, which are manifested on the Conscious - Earth level, through "evaporation and condensation". The element Earth condenses the material - physical expression of forces and energies. The element Metal is a conductor of Conscious Power in all its manifestations on Earth. The element Air carries the Spiritual Energy and the Light, which purify and renew the Body, the Mind and the Soul.
